

# Certificate of Employment

Nicholas Sjöqvist Obucina, with National ID Number 010125-1692, has been employed by the Radio Energy Performance Program, Ericsson AB in Kista during the period between 10-08-2020 to 31-01-2021.

The Radio Energy Performance program focuses on reducing power consumption in Ericsson's radio products by developing features and setting requirements.

Nicholas has served as an intern and has worked with everything from leading studies to administrative work.

A large assignment during the employment was implementing a study that compares a large selection of internal radios. This project included calculations, creating excel sheets and cooperating with many different people from several countries, and creating/maintaining presentational work.

Aside from that, a wide variety of other tasks were done. Including, but not limited to: Creating presentational material for sales and internal purposes, coordinate a small part of the quality assurance for radio systems in collaboration with Ericsson's department in Lund, information gathering, and administrative work.

Nicholas has also taken the initiative to automate the calculation process in Excel using the programming language VBA, to facilitate the work for future colleagues.

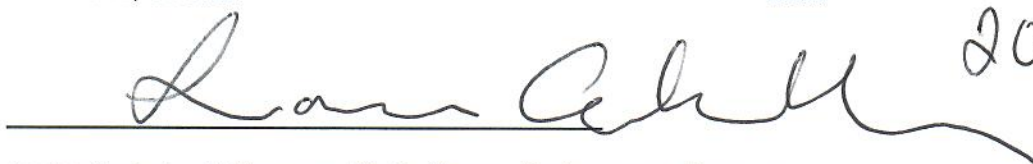

On his own initiative, Nicholas has contributed to the transition to a new and more quality-assured calculation method of radio measurement values.

Nicholas has performed his work and tasks with a positive attitude and shown interest and done well in his tasks. He has contributed to parts of the Radio Energy Program in a very thorough and patient manner, Nicholas has been an esteemed colleague with a very good ability to work together with others. He has shown great readiness in assigned tasks Therefore, we would recommend him and wish him luck in his future tasks.
